

# Algorithmic Orchestration

How Advanced Planning and Scheduling Maximizes **Packaging** Efficiency

# Pain Points that Packaging Industry Faces in the Supply Chain

- Inefficient Planning
- Limited Visibility
- Inaccurate Forecasting
- Manual Processes
- Lack of Optimization

An APS system is crucial for the packaging industry's supply chain as it can improve efficiency, visibility, and profitability. It enables businesses to enhance planning and scheduling, reduce costs, increase visibility, and improve customer service.

# THE POWER OF ADVANCED PLANNING AND SCHEDULING

	Excel (most common)	ERP	APS
Automation	★	★★★	★★★★★
Optimization	★	★★	★★★★★
Software Cost	★★★★★	★	★★★★
Integration	★	★★★★★	★★★★
Accuracy / Predictability	★★	★★	★★★★★
What-If Scenario/ Analytics	★★★	★★	★★★★★
Error Proofing/ Standardizing	★	★★★	★★★★★

# Benefits of Using Advanced Planning and Scheduling in the Packaging Industry

## INCREASED EFFICIENCY

PlanetTogether APS can optimize production scheduling and help eliminate production bottlenecks, resulting in improved operational efficiency.

## BETTER INVENTORY MANAGEMENT

PlanetTogether APS can help companies manage their inventory levels more effectively, ensuring that they have the right amount of materials and finished goods on hand to meet demand.

## Transforming Packaging Supply Chains

Advanced planning and scheduling software empowers manufacturers to make data-driven decisions that optimize production processes and ensure timely deliveries.
